

PATIENT MANAGEMENT SERVICES

Our suite of patient management tools goes beyond your typical front office software as it provides a paperless workflow for medical practitioners of all specialties, location and size.

EHR SOFTWARE

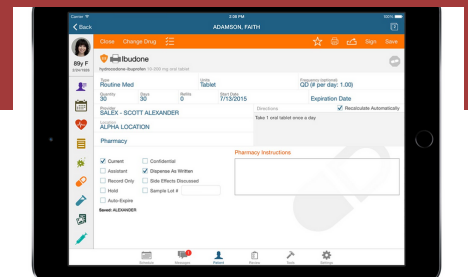

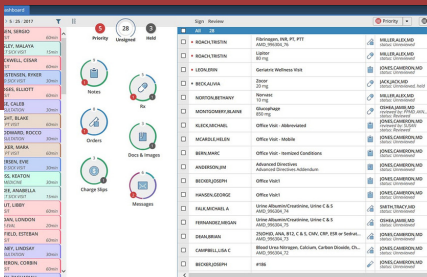

Electronic health records software with prioritized task donuts, patient cards & physician dashboard to unify all roles of your practice to improve clinical care while creating a more personal experience with patients.

SCHEDULING & MESSAGING

Because of the seamless data integration & automated processes, you can schedule patients and get accurate, relevant & effective communications to patients with minimal effort.

ePRESCRIBE

Accessing patient data across the continuum of care helps you catch potential medication conflicts, assess the efficacy of previous medications & ensure that your patient isn't allergic to what you're prescribing.

EHR FEATURES

Charting is customized to your workflow with specialty-specific templates. The automated alerts let you easily manage patient population health, conditions & preventive health routines. Easily create customizable health plans based on clinical decision support & parameter-based triggers.

PATIENT SCHEDULING & MESSAGING

Control your scheduling from a single screen where you can schedule patients, manage demographics, view referrals, verify eligibility & complete patient intake. Appointments are color coded to your preference by type, block, resource & repeating event. Schedule traditional phone appointments & allow patients to self-schedule to ensure your schedule stays full. You can proactively & retroactively manage no-shows & cancellations. Easily create personalized email & text templates for each campaign or reuse & modify past templates for new campaigns.

ePRESCRIBE

Work electronically to save time & improve communication while increasing patient satisfaction. Prescribe all medications including DEA Schedule II-V.
